

# *Destination Wedding*

PACKING LIST

TRAVELBASH

Call your cell phone provider to make sure you are covered outside of the country if applicable. If not, think about switching your package for the time you are out of town. If you decide it's not worth it to you, once you get to your destination turn your data off (airplane mode will work) and use WI-FI at the resort. (even if your phone automatically sends messages and obtains voicemails, you will still be charged.) The best thing to do is download one of my favorite apps called WhatsApp.

Note: Always leave travel information with someone who is not traveling to your destination wedding.
